## TEAK & MAHOGANY

As Royal Botania never compromises on quality, only carefully selected mature (>75 years) teakwood is used in our products. All of it harvested in strict accordance with our environmental policies. Teak wood's renowned durability is due to its high content of natural oils. The limited absorption of moisture protects the wood from warping and gives it enormous stability. In addition, teak is highly resistant to attacks by pests. It is because of these qualities, as well as its exceptionally attractive hue and structure, that teak is widely considered "the noblest of all wood types".

Mahogany is a hardwood with a reddish color that is ideal for the manufacture of furniture. Mahogany is also often used in boat building.

## STAINLESS STEEL

Stainless steel is a ferrous alloy with increased corrosion resistance due to the addition of chrome and nickel. Chlorine, the greatest enemy of RFS, can cause a type of corrosion known as "pitting". For this reason, it is recommended that in coastal locations the metal be given a surface as smooth as possible in order to further increase its resistance to corrosion. The furniture frames of the Wave is supplied with an electropolished finish as standard.

For the Ninix, O-Zon, QT & Taboela ranges we recommend the optional electropolishing treatment of the frame if it is to be used in a corrosive environment.

## CERAMIC

The ceramic tops are made from natural clays, so small color gradations can occur. This makes each table unique.

## CONCRETE

We use an ultra-high performance concrete reinforced by natural mineral components and organic fibers. Thanks to its discontinuous pore structure and crack-bridging fibers, it is virtually impervious. Penetration of chloride ions is also significantly reduced and thus performs exceptionally well in highly corrosive environments such as near beaches.

The slings on metal framed chairs and loungers are made of Batyline® fabrics, a woven polyester fibre protected by a PVC coating. This coating guarantees exceptional resistance to climatic conditions and UV exposure. The fact that there is no moisture absorption results in quick-drying, little sensitivity to staining and easy cleaning.
